ADVANCE

MAYFLOWERING TULIPS

We strongly recommend this class of tulips for garden decoration in beds as well as in groups in the herbaceous border and amongst shrubs. Grown for cut-flowers, they prove very valuable at a time when our gardens yield so little for the decoration of ours rooms. They bloom during the middle of May, a period when spring flowers are over and those of summer such as roses, have not yet come in. The blooms last in condition a very long time.

By forcing in pots they may be had in bloom in February or even earlier, most of the varieties improving in color by protection under glass or canvas.

ADVANCE. 32" A sensational new extra early blooming tulip, larger than any Darwin, stronger stems and is days earlier. The inside of the huge bloom is bright scarlet with a deep-black base. The outside is red with a deep roseate flush. A tulip that will be the center of attraction in any garden.

DILLENBERG. 28" Lovely orange-red with bronze yellow edge, inside glistening orange. Egg shaped.

EXQUISITE HARDY LILIES

Lilies are easy to grow. A few simple practices, however, will greatly increase the size and vigor of plants and bloom. They are partial to well drained soil with ample humus content to retain summer moisture. Do not fertilize heavily nor cultivate deeply. Plant them in among shrubs and perennials for best results.

All lilies offered are guaranteed to bloom the first year and are the best size for planting.

Lilies shipped until March 15th.

L. AMABILE

9 L 1—AMABILE. Brilliant grenadine-red flowers, nicely spotted with black, carried on strong, slender, 3 foot stems. Few bulbs are needed to make a brilliant dash of color in the garden because of its free flowering habit.

9 L 2—AURATUM (Gold Band Lily). Huge artistically shaped white flower with crimson splashes and a golden band through each petal.

The foliage is good and flowers grow in pyramidal cluster of 20 to 30 blooms. The blooms are turkscap-shaped, sharply reflexing petals in some, others not. The colors range from soft yellow, buff-terra-cotta, through shades of copper and orange to red, distinctly spotted with dark red or soft brown spots. Some flowers resemble Orchids in their markings.

L. CENTIFOLIUM

9 L 4—CENTIFOLIUM (Olympic Hybrids). The exteriors of the petals are delicately shaded with light greenish brown or soft wine tints and in some instances are a pure glistening white. They do well equally well in partial shade or full sun.

Each 35c; 3 for 95c; 12 for \$3.50

9 L 5—CROFT. This is the beautiful domestic Easter Lily. Equally satisfactory when forced under glass or set out in the garden. Plant in October-November.

HYACINTHS

Hyacinths will do well in most types of soil but for best results like an inch or two of rotted manure below the base of the bulb. Plant them 6 to 9 inches apart and with at least 5 inches of soil above the top of the bulb.

Be sure to put a layer of soil between the manure and the bulb. Bone meal may be used instead of manure at the rate of 1 lb. to the square yard of the lower soil.

Bulbs offered are the best grade for outdoor planting.
